MySIGNER PEN

*For people who care about
their personal
image and lifestyle*

Your unique signature

Own with pride, use with pleasure

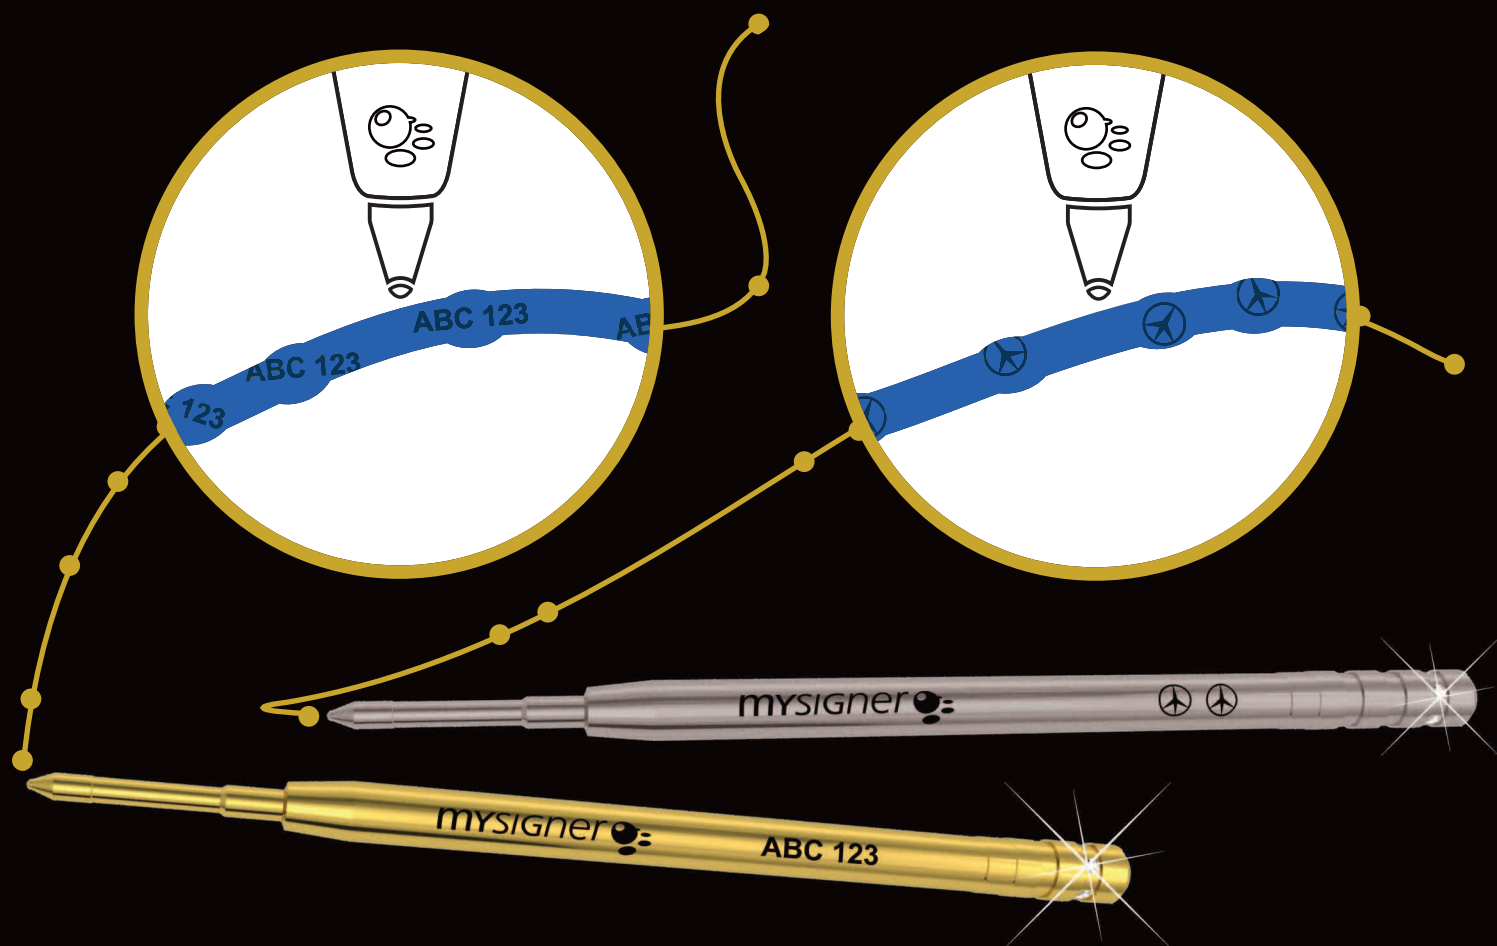

This Contract is signed
by MySigner pen
certificate no.0123456.

*Cutting-edge
technology,
a patented invention
unequaled in the world*

The construction of the MySigner Pen is based on a unique microcode embedded in a specially developed ink. When you use a MySigner Pen, the microcode appears within the line of writing in a pattern that can never be repeated. After you choose your own personal micro-symbol, your signature and other writings will be completely protected against document fraud.

It is impossible to see the microcode with the naked eye, only with a special microscope. The MySigner Pen set includes a sliding magnifier-keychain with a back-light, and special paper with glossy coating. With their help you can see your own microcode and show it to your friends or business partners.

The MySigner Pen, with its individual microcodes, is unique in the world and protected by patents in the US, Europe, China, Russia and India. MySigner Pen has the most advanced anti-forgery technology available, designed to safeguard your signature and writings on all important documents. It also protects you from forgery using copiers, scanners and other equipment. The selected micro code for the MySigner Pen may contain:

- Any letters, numbers, signs or symbols, or

combinations of these; for example, birth dates, names, initials, acronyms or abbreviations;

- Drawings, logos, trademarks or company names.

The MySigner company guarantees that their products contain only certified precious metals, gems, and other materials that comply with international standards. The warranty period for MySigner Pens is 24 months from date of purchase.

*MySigner: The status and luxury of the
world's most advanced pen*
